

Rejuvenate™

biological stimulant and energy source for microbes

Rejuvenate™ is a blend of carbohydrates, enzyme cofactors, and humic substances. It is used to stimulate microbiology, thereby enhancing decay of crop residue and improving soil tilth.

features & benefits

- Builds an environment in which micro-organisms can flourish
- Acts as a catalyst for protein synthesis (creation) and proteolysis (break down)
- Helps crop residue decompose faster which reduces the potential of overwintered diseases
- Promotes faster release of soil mineral reserves
- Increases soil calcium availability

where & how to use

Farmers are using Rejuvenate™ to reduce the amount of residual stalks, vines, leaves, rotten fruit, and limbs that can harbor disease and insects.

Use as a compost enhancer.

Crop residue should be in contact with the soil.

Microbial inoculants may be used in conjunction with Rejuvenate™ in situations where disease was heavy or crop residue is high in lignin.

This product is suitable for use under NOP. Please check with your certifier before using.

Do not tank mix with herbicides.

nutritional supplement makeup

Rejuvenate™ is derived from stable complete humic substances, carbohydrates, and sea minerals.

Rejuvenate™ is a beneficial blend that provides many components that are needed to build, strengthen and maintain your soil microbial life, vigor, and health. Many of these components are missing in conventional agriculture.

application rates and timing

The best times for application are (a) in the fall after crop removal, (b) sprayed on cover crops before incorporation, or (c) in the spring at planting.

For soil with little or no residue or cover, apply at a rate of 6-8 quarts per acre.

For heavier residue cover such as corn or beans, apply 2-3 gallons per acre; for soils low in biology, add a microbial inoculant such as Spectrum™.

For fruit and vegetable production, rates may be increased up to 5 gallons per acre with increasing benefits.

For specific application questions, please contact your AEA consultant or call 800-495-6603.

While this product can be used individually, it has been designed to be used along with other complementary products as part of an overall fertility program that will produce the highest quality results.

If you are currently not taking advantage of our consulting service, please call 800-495-6603 to get connected with an AEA consultant.
